

REMARKS

Claims 7, 8, 10 and 11 are presently pending. Claims 1,2, 4-8, 10, 11, 13, 14, 16, and 17 were rejected. Claims 1-6, 9, and 12-17 are cancelled without prejudice. Claim 7 is amended.

Claims 7, 8, 10, and 11 were rejected under 35 U.S.C. § 112. Assignee has amended claim 7 and it is respectfully submitted that the rejection under 35 U.S.C. § 112 is now overcome.

Claims 7 was rejected under 35 U.S.C. 103(a) as obvious from the combination of King in view of Purnaveja. Claim 7 recites, among other limitations, "memory for storing a data structure, the data structure comprises a compressed representation of a first frame". Examiner has indicated that King teaches the foregoing at Figure 1, block 14.

Assignee respectfully traverses the rejection. King, Figure 1, block 14 is merely a "data memory". King teaches that "Input tools in the instruction memory 15 are coupled with the keyboard 17, mouse 18, microphone 19, and possibly other input devices in order to store input data into the annotation data structure in the data memory 14." However, King does not teach "memory for storing a data structure, the data structure comprises ... of a first frame", much less a "compressed representation of a first frame" as King does not even disclose a "decompression engine".

Accordingly, Assignee respectfully requests that Examiner withdraw the rejection to claim 7 and dependent claims 8, 10, and 11.

For the foregoing reasons, each of the pending claims are allowable, making the application in a condition for

allowance. Assignee respectfully requests that Examiner pass this case to issuance.

Additionally, it is believed that this correspondence is accompanied with the appropriate monies (either by check or authorization to charge deposit account) for the actions requested herein. To the extent that it is not, Commissioner is hereby authorized to charge or credit overpayment to account 13-0017, of any additional fees for the actions requested herein.

Respectfully submitted,

Mirut Dalal
